

ROOFMEET

Sports, Activities, Social meetings and more

- Rooftops are private places which usually left unused or for storage or technical installations. But what if we can turn this unused space into beautiful social public space where people can gather, play, learn and share hobbies. By connecting all these activities on roofs by one single mobile application called ROOFMEET.
- An Application to find all roof activities around you with their offers and opening time and to find who is there and to connect with people there and also to join if you have any activity on your roof and reference your roof by ROOFMEET. The App also can help you find the perfect company to construct your activity on your roof.
- This app will redefine & recreate the city's public spaces and public activities and give it new point of view through the city's existing building's roofs.
