An App For Sony Ginza Park

Ginza Sony Park which already acting as an interesting and attractive new public space for Ginza arranging different type of public programs for the people of Ginza. The Idea is to develop an app for Ginza Sony Park where authority will tell which kind of program they are wanting to arrange next week/month and by voting people will decided whether they want these program or something else to happen. It will connect the authority and visitors in a point where they can exchange their thoughts.

Ginza sony park has almost all the features of amusement,the developed ideas like adding options like DIY architectures,3D printers etc will let the visitors creat their dreams.It will also help the authority to know what people want in their city of dream,which may open new dimension to think for the developers.As it is an experimental park,the app will be perfectly suited.There will be three main division,one is for authority,one for visitors another for the vendors.

Programs
